SUBJECT: DRIVING OF UNIVERSITY VEHICLES

Dear SMU Community

Over the past couple of weeks, a number of vehicles accidents have been reported. These incidents have occurred whilst students were driving them. These reported incidences pose a serious threat to the university thus the University has decided to put in tight security measures to mitigate this risk from extending any further. Effective from the day of this publication, no university vehicles will be driven by students – this applies to the university golf carts as well. Students will be assisted by a designated university official employed by the university for this purpose. Students to be assured that there are mechanisms in place to ensure that they are assisted and always supported when they require transportation. The defined processes to booking transport remain applicable.

Kind regards,

Ms. Evelina Mahlangu

HoD: Transport (Acting)
