

OFFICE OF THE CHIEF OPERATING OFFICER

To : SMU Student and Staff Members
From : Prof PH Demana
Subject : **Water Supply Interruptions Notice update**
Date : 22 September 2023

Dear SMU Community

Please note that water supply has not been restored on campus following Tuesday's thunderstorm that affected Rand Water infrastructure.

The estimated time of return is currently unknown.

The lack of water supply poses health risk hazards, and therefore if by 10:00 am this morning, there is still no water supply in the campus, SMU staff is therefore requested to work from home today.

Academic activities can continue online where possible.

As an interim measure, alternative water supply will continue to be provided for residences.
