

SEFAKO MAKGATHO
HEALTH SCIENCES UNIVERSITY

SMU Library in partnership with the **Research Directorate for Postgraduate Studies, Research Capacity, Development, Integrity and Ethics** invites you to attend the

WEBINAR: Open Data Governance Models for Data Management at Research Institutions 2020

The aim of the webinar is to provide participants with an overview of open research data governance frameworks for data stewardship, and to elaborate on procedures for managing research data throughout the data life-cycle

TARGET GROUP: This webinar is for research administrators, researchers, librarians and postgraduate students

INSTRUCTOR: Ms Lynn Woolfrey | Manager, Data First | University of Cape Town

She is a data scientist with 20 years' experience curating disaggregated African data with researchers worldwide. She manages data operations at DataFirst, a data service and research unit at the University of Cape Town. She set up Africa's only CoreTrustSeal certified open data repository as well as the only secure data centre in Africa, to give researchers safe access to highly disaggregated government data. She trains data managers in government and research institutions across Africa and is also involved in government data-readiness projects targeted towards the realisation of the UN SDGs. Her Phil thesis examined information ecosystems for data-directed decision-making in African countries and her research focus and passion is open data.

AGENDA:

Day 1: 24 Nov 2020

Data Governance Models for Research Administrators and Librarians

09:15 - 09:30	Opening Remarks: Prof O Ayo-Yusuf
09:30 - 11:30	Open research data in the context of Open Science
11:30 - 13:30	The Research data life-cycle
13:30 - 15:00	Managing the data life-cycle in your institution (challenges and options)

Day 2: 25 Nov 2020

Research Data Management for Researchers

09:30 - 10:30	Data discovery – finding data for your research
10:30 - 11:30	Creating a research data management plan
11:30 - 13:30	Preparing your research data – standard formats and file types
13:30 - 15:00	Describing your research data – creating useful metadata
