15. APPOINTMENT OF A PROFESSIONAL ARCHITECT FOR REFURBISHMENT OF RESIDENCE 1C FOR SEFAKO MAKGATHO HEALTH SCIENCES UNIVERSITY.

1. Purpose

The Sefako Makgatho Health Sciences University must refurbish the Student Residence 1C. The purpose of this terms of reference is to outline the requirements for the appointment of the Architectural Professional Service Provider to design and implementation the Refurbishment of Residence 1C.

2. Background/ Project Description

Sefako Makgatho Health Sciences University is responsible for providing student residence facilities that are conducive for living and learning; in a safe, secured, and well maintained facility.

Conditional assessment was carried out to assess the condition, structurally and functionally of the building. Different remedial solutions were tabled to rehabilitate the buildings including services which formed the basis of the scope and budget.

| Residence 1C | | |
|---------------------|---|--|
| | Findings | Recommendation |
| | | |
| Structural | The building is in the visibly good condition. The washing screen wall has leaned forward from its original position. External floor slab is exhibiting cracks. Maintenance of the roof required. Rusted roof sheeting and old water proofing to be replaced. | The washing line screen wall need to be demolished/removed as it may be a safety hazard to the occupants of the residence. The remedial crack repair needs to be undertaken locally on areas of concern. Roof to be repaired. |
| | | |
| | | |
| Finishes | Broken wall and floor tiles in the Ablution facilities. No shower doors and heads in the Bathroom facilities. Brocken Ceiling Panels, sign of roof leak on the ceiling. | Repair in places with similar vinyl sheeting and tiles in bedrooms. Where damp is evident, walls to be stripped of paint, source of ingress of water to be identified and sealed prior to repainting. Underside of slab to be repainted with mould proof paint. New suspended ceiling. All curtain rails in 20 rooms to be replaced. |
| | | |

| | | |
|-------------------|---|---|
| | | |
| Electrical | The DBs are not lockable, whilst the electrical cupboards housing these are also not lockable. Some earth leakage circuit breakers are not working, meaning that students are not protected against electric shock from socket outlets. This is a serious safety concern; Outgoing cables from DBs do not have appropriate containment, wherein cables can be seen dangling untidily. | It is recommended that the existing DBs be replaced with new that are lockable, appropriately labelled and fitted with a warning sign. All outgoing cables to be laid in trunking. Circuits that are faulty or compromised need to be rewired. Each circuit in every DB must be tested and a certificate of compliance must be issued for each DB in terms of SANS 10142-1. |
| | | |
| | | |
| Mechanical | This electric boiler was custom manufactured in 1981 for immediate installation and commissioning. | Immediate replacement required. Poor housekeeping in plantroom should be corrected. |
| | The expected lifespan of the tank-type water heaters is average 12 years with proper maintenance. This has far been exceeded and therefore the system cannot be relied on. There is always a high risk of unexpected breakdowns. | |
| | | |
| | | |
| Fire | No A3 layouts at the entrances to indicate escape routes and location of fire-fighting equipment for the building, as per requirements of the Fire Protection Standard SANS 10400; | It is recommended that initially, the services of a fire protection specialist be procured in order to develop the building's fire evacuation plans for approval by the Local Council. Fire Marshals for the campus are highly recommended. |
| | No visible area demarcated as a fire assembly point; Poor location of fire escape signs, where available. Otherwise missing in some areas; Some fire hose reels showing a cracking pipe, | They must be appropriately trained and provided with all equipment and resources necessary to effectively carry out their duties as defined in the Building Regulations. Regular fire drills are to be carried out to ensure occupants' |

| | | |

| | missing nozzle, no seal; Fire escape signs under-provided | familiarity with fire-fighting as well as fire evacuation procedures. |
